Mercedes-Benz S600 MY04

Description

This is a car you simply cannot describe over a computer. It's the flagship 2005 update series W220 S600 V12 5.5 litre twin-turbo with 368kW of power and 800 Nm of available torque at only 1800-3500 rpm. All we can say is that this car is literally unmarked on the bodywork, timber, dash, leather and the suede headlining is like new. We have been told that the previous owner has now purchased a brand new car and had the car since brand new and the Obsidian Black with the black leather interior is by far the most popular colour combination and we literally wait years for cars like this one to come up. Rear entertainment with remote, rear electric seats, rear air conditioning and heating in the seats, sun roof, blue tooth, navigation, parking sensors, adjustable suspension, and only 84,000 klms since new which is nothing for this silky smooth V12 beast. Obviously it goes without saying that this is a very rare car and would have been close to \$400K when new in 2005 but this is the very last of the W220 series and to be honest if we don't sell this car it's probably something we will keep as a collector's item anyway. We're so proud of it and will be taking this to the Mercedes Benz Concours d'Elegance this year. We look forward to meeting you in person and spending a decent amount of time showing off this long wheel base S-Class.
